

NERVE PROBLEMS

OPDIVO® (nivolumab)/YERVOY® (ipilimumab)
Combination for Melanoma

Report immediately to your oncologist's office

What are the symptoms?

- Weakness on one or both sides of the body (legs, arms, or face)
- New or worsened pain, numbness, or tingling in the hands or feet
- Trouble walking
- Difficulty writing
- Trouble holding items (dropping things)
- Having a hard time getting dressed (eg, buttoning buttons)

What you should tell your oncology team member:

- When you first noticed the symptoms above.
- How severe the symptoms are.
- If the symptoms are interfering with your daily activities.
- A list of medications and supplements you're taking.
- If you've ever had similar symptoms before, walking problems, or diabetes.
- What you have tried at home to manage the symptoms.

 **Red flags – Call your oncologist's office immediately – if they are not available, go directly to the Emergency Room.**

- If you have trouble breathing along with these symptoms.
